Professional Summary

Backend Engineer with 3+ years of experience building RESTful APIs, scalable backend systems, and production-ready web applications using FastAPI, Laravel, Python, and PostgreSQL. Experienced in authentication systems, RBAC authorization, database optimization, and modular backend architecture. Skilled in developing secure, maintainable, and high-performance backend services with Docker and modern API development practices. Passionate about scalable system design, backend performance optimization, and building reliable software products for international teams.

Core Competencies

- REST API Development
- Backend System Architecture
- RBAC Authorization Systems
- JWT Authentication
- Database Optimization
- Async Backend Development
- Secure API Design
- Dockerized Development
- Modular Backend Services

Technical Skills

Backend Development: FastAPI, Laravel, Python, PHP, RESTful APIs, SQLAlchemy 2.0

Database Technologies: PostgreSQL, MySQL, Database Design, Query Optimization

Authentication & Security: JWT Authentication, RBAC Authorization, Authentication & Authorization

Architecture & Development: Async Backend Development, Clean Architecture, Modular Services, Service-Oriented Architecture

DevOps & Tools: Docker, Git, GitHub, Linux, CI/CD Basics, API Documentation

Frontend Integration: React, Next.js

Professional Experience

Backend Developer

Curves n Colors, Kathmandu, Nepal

Aug 2025 — Present

- Developed and maintained production-ready RESTful APIs using FastAPI and Laravel
- Designed modular backend services with PostgreSQL and MySQL for scalable application workflows
- Implemented JWT authentication and RBAC authorization systems for secure access control
- Optimized database queries and backend workflows to improve API response efficiency
- Collaborated with frontend developers and deployment teams for production integrations
- Maintained clean and scalable backend architecture following modern engineering practices

Junior Backend Developer

Code Himalaya, Kathmandu, Nepal

Mar 2023 — Aug 2025

- Built backend applications and RESTful APIs using Laravel MVC architecture
- Developed authentication systems, CRUD modules, and administrative dashboards
- Worked with MySQL database relationships, validation systems, and query optimization
- Assisted in debugging, backend maintenance, deployment workflows, and API integrations
- Collaborated with development teams using Git workflows and agile methodologies

Selected Projects

Food Delivery Platform | [FastAPI Backend Architecture](#)

- Built a production-ready food delivery backend using FastAPI, SQLAlchemy 2.0, and PostgreSQL
- Implemented RBAC authentication systems for customers, farmers, and delivery agents
- Developed async REST APIs with modular service layers and scalable backend workflows
- Integrated payment workflows, order tracking systems, and notification functionalities
- Designed optimized database schemas with backend validation and secure API communication

[GitHub Repository](#)

Event Scheduling System | FastAPI Backend Infrastructure

- Developed a scalable event scheduling backend system using FastAPI and PostgreSQL
- Implemented RBAC permission management, scheduling workflows, and event APIs
- Built modular backend services with async database operations and scalable architecture
- Designed secure authentication systems and optimized backend workflows

[GitHub Repository](#)

Enterprise Dynamic RBAC Authorization System | Backend Architecture

- Built a fully dynamic role-based access control system with grouped permissions
- Developed scalable permission management APIs and admin role assignment workflows
- Implemented enterprise-level authorization architecture for scalable applications
- Optimized database relationships and permission validation logic

[GitHub Repository](#)

Zyabaa E-commerce Platform | Full Stack Development

- Built a scalable full-stack e-commerce platform using Next.js and Laravel APIs
- Integrated payment gateways including eSewa, Khalti, Fonepay, and Stripe
- Implemented JWT authentication and secure API communication workflows
- Developed scalable product management and order processing systems
- Optimized backend communication and API response performance

[Live Production Platform](#)

Soaltee Hotel Platform | Laravel Backend Development

- Developed and maintained backend features using Laravel, Blade, and MySQL
- Implemented booking workflows, CMS functionality, and backend validation systems
- Worked with Laravel MVC architecture and scalable backend modules
- Collaborated with frontend developers and deployment workflows
- Improved backend maintainability and database-driven functionality

[Live Production Platform](#)

NIA Nepal System | Laravel Backend Contribution

- Contributed to backend development using Laravel, Blade, and MySQL
- Worked on secure data handling, validation workflows, and backend processing systems
- Assisted in maintaining scalable administrative modules and backend workflows
- Participated in debugging, testing, and deployment-related tasks

[Live Production Platform](#)

Certifications

- Backend Development with Python and FastAPI
- Docker & Containerization Fundamentals
- REST API Development and Backend Architecture

Education

Bachelor of Information Management (BIM) Gupteshor Mahadev Multiple Campus, Kathmandu, Nepal	2019 — 2024
Higher Secondary Level (+2) Janapriya Multiple Campus, Kathmandu, Nepal	2017 — 2019

Languages

-
- English — Professional Working Proficiency
 - Nepali — Native Proficiency
 - Hindi — Conversational
